TOYO SUBMERSIBLE AXIAL SLURRY PUMP

**SR**

**FEATURE**
- The motor is submersible motor and it don’t need facility for protecting motor like as other vertical axial pumps.
- Mechanical Seal designed free from direct discharge pressure and has long life-time.
- Without long shaft and submerged bearings and SR has short shaft and greased bearings without trouble caused by abrasion.
- Easy maintenance by compact design and simple construction.
- High Chrome casting iron is used for Impeller and Impeller Disc and it provides enough durability against slurry.
- No noise caused by motor as the motor of SR is submersible.
- No trouble of water leakage into the motor as the motor of SR is submersible.
